AMENDMENT AND RESPONSE TO RESTRICTION REQUIREMENT

In response to the Office Action mailed 12/12/2002 please amend the application as follows.

In the claims (see Attachment for present amendments)

A magnetic head assembly, which has an air bearing surface (ABS), comprising:

 a spin valve sensor, nonmagnetic first and second read gap layers, a ferromagnetic first shield layer and a ferromagnetic first pole piece layer;

the spin valve sensor being located between the first and second read gap layers and the first and second read gap layers being located between the first shield layer and the first pole piece layer;

the spin valve sensor having a pinned layer which has a magnetic moment that is pinned by a pinning layer in a direction perpendicular to the ABS;

a ferromagnetic second pole piece layer and a nonmagnetic write gap layer wherein the second pole piece layer is separated from the first pole piece layer by the write gap layer at the ABS and is connected to the first pole piece layer at a back gap;

each of the first shield layer and the first and second pole piece layers having a magnetic easy axis that is directed parallel to the ABS;
